Xerox Digital Disc Duplicators Now Compatible with Windows 7 and 64-Bit Editions of Windows Vista

Posted Nov 2, 2009

 [Print Version](#) **Page 1** of 1

The Xerox® Digital Disc Duplicator series, including standalone tower DVD, CD, Blu-ray and LightScribe capable duplicators, is now compatible with the Microsoft Windows® 7 operating system as well as 64-bit editions of Windows Vista.

ENTER HERE!

"Ensuring that Xerox digital disc duplicators work flawlessly with Microsoft IT technology is critical to the success of our customers, and will remain a priority for Xerox," said Craig Ephraim, director of brand licensing, Xerox Corporation.

The entire Xerox disc duplicator series also includes the innovative 'Drag and Drop' function. This feature allows users to connect their duplicator to a PC and transfer one or more image files directly onto the duplicator's internal hard drive through a USB or Ethernet connection. Once the files are stored on the duplicator's hard drive, users can make as many copies as required without being tied to a PC. This saves customers the time and effort usually required to produce a master disc for each image file.

Availability

Windows 7 and 64-bit edition Vista drivers for Xerox disc duplicators are available immediately on Vinpower Digital's web site at www.vinpowerdigital.com/TechnicalSupport/Downloads/Downloads.asp.

About Xerox Digital Duplicators

Xerox Corporation and Vinpower Digital, Inc. entered into a trademark licensing agreement in December 2007 for Vinpower to develop, market and support a new line of Xerox-branded CD,
